STEWING BEEF, per lb. 07c

CHINOOK MEAT MARKET

Heathdale Happenings

The U. F. A. Sunday at Faulkners Grove was well attended, and a very nice afternoon was enjoyed. The weather was ideal. The singers from the Red Deer Northern Bible College were greatly enjoyed by all present.

The program committee and the Coltholme Local takes this opportunity to thank all those who helped to make the day a success.

A public meeting will be held at Cloverleaf school on Friday June 22 at 2 p. m., when Mr. Donald Cameron from the Department of Extension University of Alberta will give a lecture accompanied with lantern slides. There will be a small charge or collection made to defray expenses. It is unfortunate that this lecture could not have been at some other time, but the Coltholme local U. F. A. has been trying to get this speaker since Sept.

INDUCTION SERVICE

The joint induction service for Rev Donald McGregor into the Cereal Chinook pastoral charge of the United Church will take place in Cereal church, Friday, June 29 at 8 p. m. Members and friends of the Chinook church are cordially invited to be present. Rev F. F. Kemp of Oxy will act as chairman and deliver the charge to the minister, while Rev Thomas Snodden of Youngs town will address the congregation. Lunch will be served at the conclusion of the ceremony.

CHINOOK SPORTS DAY

Dinning Room Will Be Open all Day

SPECIAL RATE will be given to Ladies & Men's Ball teams dinning here

The Advance

Pearce Stock-Watering Scheme Meeting Is Well Attended At Youngstown

YOUNGSTOWN, Alberta, June 19 - At an enthusiastic meeting of farmers and others interested in the welfare of the districts bordering the Goose Lake line on Friday, the steps were taken toward forming an organization for the purpose of raising public opinion in favor of what is known as the William Pearce stock watering scheme, and urging upon the governments the concerned undertaking work as a relief measure.

A petition circulated was largely signed and the scheme received unanimous endorsement after it had been explained by G. J. A. Forester, M. L. A. for Hand Hills & Lorne, and foot M. L. A. for Acadia. The petition was forwarded to Hon. R. B. Bennett, prime minister.

The scheme is to divert water from the North Saskatchewan and other rivers in the Rockies and use it for irrigation and stock-watering through south-eastern Alberta and Saskatchewan. It was first proposed by the late Wm. Pearce, irrigation engineer of the C. P. R. who urged it upon the Dominion Government with the result that a complete survey was undertaken by the reclamation Service in 1920 and 1921.

This survey found that the scheme was entirely feasible and that nearly half a million acres could be brought under water in Alberta and close to a million acres in Saskatchewan. Water can be taken from the northern rivers and carried as far as Saskatoon, irrigating large tracts of land on the way. Besides tracts at Sullivan Lake and Youngstown districts large tracts of land could be irrigated around Acadia Valley, Kindersley, Elrose, Rosetown and Saskatoon districts.

It is being urged upon the Dominion government that this work be undertaken as a relief measure and paid for out of the public works program for relief which has been passed by the federal government. The work of digging canals and ditches would provide work for the unemployed for the next few years and would relieve the general unemployment situation to a large extent, it would also provide work for local farmers, a great number of whom have been receiving relief by providing them work near home. It would transform what is now designated the "drouth area" into a fruitful and very productive country, and would save to the country a large area that is now rapidly becoming depopulated.

It is planned to carry the scheme into other districts and bring before the people a realization of what it would mean to them, to the end that sufficient public interest would be aroused to make at least a western question of the matter that will be heard at Ottawa. The Alberta legislature voted unanimously in support of the project at its last session.

Linklater Sentenced To Three Years Wednesday

Pleading guilty, and electing for speedy trial, Wm. Linklater was sentenced to three years in penitentiary by Judge A. M. MacDonald in regular sittings of District Court, held here on Wednesday, afternoon. The charge was one of theft of funds from going upon the governments. The alleged theft of an amount of approximately \$36,000 covered a period from 1919 to 1934 and Linklater transferred all of his assets to the municipality, with a view to restitution. W. N. Graburn appeared for Crown, while E. Dunbar of Calgary represented accused.

— Hanna Herald

Wedding Bells

BEACH—NEFF

The residence of Mr. and Mrs. Charles E. Neff was the scene of a very pretty wedding on June 18 at high noon, when their daughter Dorothy Gladys, became the bride of Mr. Henry Herbert Beach, son of Rev and Mrs. H. Beach of Hanna.

The ceremony was performed by Rev. F. J. Hartly, in the presence of relatives and intimate friends under an archway made of pink and white streamers and white bells.

The bride, who was unattended entered the drawing room to the strains of Mendelssohn's wedding march played by the bride's sister Mrs. J. C. Turple. Mr. Neff gave his daughter in marriage. She was becomingly gowned in white silk organdie, with picture hat and gloves to match, and carried a bouquet of roses. Mr. Harry Smith and Miss Janet Cook's good the register.

A dainty buffet luncheon following out the color scheme of pink and white was then served. Mr. Harry Smith proposed a toast to the bride and groom, which was responded to in an appropriate manner by the bride-groom. The happy couple then left by motor for a short honeymoon to be spent in Calgary and Banff. The bride wearing a smart swaggar suit of navy blue silk with matching accessories. On their return Mr. & Mrs. Beach will reside in Hanna. They were the recipients of many beautiful and useful gifts including a beautiful dinner set from Jenkin's Groceries.

The invited guests were, Rev. and Mrs. Beach and daughter Elizabeth, Mr and Mrs J. C. Turple & sons Glenn and Rex of Chinook, Alta, Mr and Mrs Ed Neff and children Dixie and Bobby of Kelowna, B. C., Miss Audrey Neff, Rev and Mrs Hartly, Mr and Mrs C. Fleming, Mr and Mrs Harry Smith and Dale, Misses Anne Thompson and Janet Cook.

COOK—BROSTON

The Danish Lutheran Church at Calgary, was the scene of a quiet wedding last Saturday June 16, when Miss Agnes Broston became the bride of Mr. Gustav Cook. Rev. J. Knudson officiating.

Gold Soap, 10 bars	38c
Tea, 1 lb. package	40c
Coffee, "Our Special" 1 lb.	23c

War Debt Revision Looms

Great Britain's action in deferring payment of the \$261,791,000 instalment due the United States on June 15, has thrown the whole war debt problem again prominently into the field of international controversy. It poses the United States government with the inescapable necessity of initiating discussions preliminary to a complete review of the war debt situation. It forces a showdown.

Great Britain, of course, will not be satisfied with a mere review. It wants revision of the terms of settlement—revision drastically downward. It wants as much consideration from its creditor, as it (a creditor) has given its debtors. At the very worst, it seeks as generous treatment, on principal and interest, as was given France and other countries by the United States.

In failing to make even a so-called "token" payment on the instalment due June 15, Great Britain informed the United States that the terms of the agreement between the two countries in respect of war debts imposed "a burden which was both unreasonable and inequitable in relation to other countries." The facts justify this statement. Whether intentionally or not, Britain has been adversely discriminated against.

Great Britain, according to the records, borrowed \$4,277,000,000 from the United States, a large per centage of which was not for its own use, but on behalf of allied countries during the war. The money was spent in the United States for war material and was the real foundation of the extremely high wages paid munition workers in that country during the war. Since the Baldwin agreement which fixed the terms and conditions of repaying the war loans, Great Britain has made instalment payments aggregating \$2,025,000,000. Because of the high comparative interest rate paid by Britain, however, London is still indebted to Washington in the sum of \$4,713,785,000. That is to say, after paying back more than two billion dollars, Britain still owes more than the original debt.

Obviously, the situation clamors for reasonable adjustment from that aspect alone. There are other, equally cogent, reasons why revision should be made. There are irrefutable arguments why the debt problem should be solved finally and amicably. That war debts should remain a subject of international controversy, cropping up periodically to stir prejudices and animosities, is a reflection upon the intelligence of the two great English-speaking nations towards whom the world looks for preservation of concord among the countries of the world.

Great Britain's agreement to pay instalments in the amount of approximately \$262,000,000 was predicated, in the first place, upon expectations of a similar amount being paid by France and other European countries in respect of war debts due London. Britain lent more than she borrowed. In order to avoid financial and economic chaos, however, the British government decided to suspend all claims against debtor nations for payments on war debts, and takes the position now that, if it must pay the United States in full, it must exact payment of a corresponding amount from its own war debtors. The position is quite understandable—and undoubtedly reasonable.

"Such procedure," said the British note to Washington, "would throw a bombshell into the European area which would have financial and economic repercussions over all five continents, and would postpone indefinitely the chances of world recovery."

Consequently, Britain politely suggests the United States should do its bit "to speed world recovery by recognizing the realities of the situation and revising present agreements on a payable basis."

The question is not that Great Britain is anxious to escape payment of its indebtedness. Suggestions have emanated from London, from time to time, for liquidation of the entire obligation by lump sum payment. Washington has not viewed this suggestion favorably, heretofore. In fact, an intransigent position has been taken by some of the most vocal of American legislators who take the "pound of flesh" viewpoint. Furthermore, Britain's failure to make even a payment on account—the "token" payments such as were made in June and December 1933—has been attributed to the Johnson Act, passed this year, which specified that any nation not making payment in full on the due date, should be considered as in default.

The British note is couched in language which the people of Western Canada will appreciate and approve. It strikes a manly note of independence and forthrightness. While declaring payment would be deferred until "it becomes possible to discuss an ultimate settlement of inter-governmental war debts with a reasonable prospect of agreement" the note asserts the British government has no intentions of repudiating its obligations.

Japanese Trade Invasion

New Penetrating Traditional United States Markets

Japan's steady successful invasion of traditional United States export markets was disclosed in the department of commerce annual world economic review for 1933. The report showed larger Japanese shipments of competitive articles to the United States, high export increases to Latin America, a Japanese victory over American manufacturers in the battle for the Philippine textile trade, and increasing sales in Europe, Africa and elsewhere.

Grandma was helping Peggy make out a list of little guests for her holiday party.

"How about the Morton twins?" grandma asked.

"Well, there's no need to ask them both," Peggy answered, "they're 'nearly alike'."

Few People Escape Attacks Of Summer Complaint

Summer Complaint may be slight, or it may be serious, but you can't tell when it seizes you how it may end.

Allow the profuse diarrhoea, the vomiting and purging to continue, for a day or two, and you may become weak and prostrate.

Just as soon as you feel any looseness of the bowels go at once to your drugstore and get a bottle of Dr. Fowler's Extract of Wild Strawberry and check this untimely attack before the weakening looseness can get started.

Don't experiment. Get "Dr. Fowler's." It has been on the market for 35 years.

Making China Seas Safe

Marine Department Continues Work To Provide Guidance For Ships

Typhoons do not tell the whole story of the China Seas. Fog may assail the shipping on the Chinese coast at almost any time, and storms independent of the typhoon are frequent. The coast itself is as dangerous and the sets of its tides as treacherous as any in the world. Casual islands and shoals demand the utmost vigilance, and the seamen who man Chinese junks are no mean masters of the ancient craft of navigation.

The lighting of the China coast is not a century old. The National Lighthouse Service was founded about the middle of the nineteenth century by Sir Robert Hart, who was authorized by the government of the day to start a system of lighting for the benefit of navigation. Sir Robert possessed himself of a few qualified experts, and he and his colleagues, foreigners established the nucleus of a service which, in the Chinese Maritime Customs, now provides guidance not only to ships at sea but to the countless craft navigating the rivers of China and in particular the Yangtze.

The romance of the Marine Department of the Chinese Maritime Customs has yet to be written. This organization, originated by Sir Robert Hart and his devoted helpers, has developed unobtrusively, and its traditions and efficiency have been maintained by successive Inspectors-General.

For the last five years or so bonitas have waylaid the staff engaged in marking out channels for navigation. They have removed beacons and buoys—which have been promptly restored—and have subjected the Customs launches to such assiduous maintenance that those craft have to be protected by metal plates and shut up like sardine tins. Near Anking, the capital of Anhwei, there is Christmas Island, a favorite spot for the handbills in the Lower Yangtze. Twelve robberies of lighthouses or lightboats occurred there in 1931.

But the work proceeds, the progress is kept open. The Tungting Lake has been lately surveyed. Improved marks have been established and the River Inspectorate has added to its store of knowledge and given it to the river public in thousands of notices.

Flag Made By Prisoners

Union Jack Secretly Made In German Camp During War

Made in a German camp during the World War, a British Union Jack was used during the unveiling recently of a memorial in Manchester, England. Ex-Petty Officer James Allen, who brought the flag home, in Sprottau, Silesia. "A Russian, who was allowed out," he said, "used to smuggle in a little bit of cloth at a time, and in the tailor's shop another Russian secretly made it up to the instructions of the British. We produced it first at the funeral of one of the British prisoners, and in all it was used on 21 such occasions. Only once did the Germans show any objection. The flag was drying on the wall, and when an inspecting general saw it he stopped, snarled, 'Scheiss-hunde', and passed on. Each member of his staff did likewise."

Animals As Witnesses

Were Used In Sardinia Until Few Years Ago

Animals were used as court witnesses in Sardinia up to a few years ago. When a solitary householder killed an alleged burglar he was brought to trial and made to swear that the homicide was justifiable. The oath was taken before one of his dogs, cats or birds that witnessed the killing. If the animal did not manifest some contradictory sign the prisoner was set free.

Buried On Rifle Range

Col. John Hopton, a famous rifleman who is well known to Canadian and other overseas marksmen who have competed at Bisley, was buried in accordance with his expressed wish, at the firing point of the 1,500 yards range on his own estate, in Hertfordshire. He had competed at Bisley Empire meet for 36 years.

Are Unknown Specimens

Three crane flies, collected by King Leopold of Belgium, were received at Amherst College for classification. Dr. Charles P. Alexander, professor of entomology. The flies, unknown specimens of Tipulidae, are long-legged and slender, resembling

Tennis' became a sport more than 700 years ago, but in its beginning it was an indoor game and has been "lawn tennis" only since 1874.

Zoo Fatality

Lions In Cage Kill Victim As Horrified Spectators Watch

While a crowd of horrified spectators looked on, four lions in an open-air zoo at Whilpennade, Eng., killed a zoo employee who had gone into their pit to recover a visitor's hat.

The owner of the hat and several other persons who tried to save the victim, Stanley Lewis Stenson, were driven back by the lions, two of which were eventually killed by keepers before they could recover Stenson's body.

Stenson, employed in the catering department of the zoo, apparently decided suddenly to attempt to retrieve the hat and went into the enclosure between the outer barrier and the railing surrounding the pit in which the lions are kept.

As he crawled along the top of the inside railing two of the lions reached through the bars and began mauling him.

Stenson was unable to get away from the lions' claws and several spectators went into the place to try to pull him away, but were not successful as the two other lions joined in the attack through the bars.

Stenson then fell into the pit, striking his head on the concrete about 16 feet below. The lions dragged him further into the pit and killed him as the horrified spectators screamed and several women fainted.

The keepers had to shoot two of the lions before they were able to drive the others into their cages at the far end of the pit.

Recipes For This Week

(By Betty Barclay)

HOT MILK SPONGE CAKE (3 eggs)

- 1 cup sifted cake flour
- 1 teaspoon combination baking powder
- 1/2 teaspoon salt
- 3 eggs
- 1 cup sugar
- 2 teaspoons lemon juice
- 6 tablespoons hot milk.

Sift flour once, measure, add baking powder, salt, and sift together three times. Beat eggs until very thick and light and nearly white (10 minutes). Add sugar gradually, beating constantly. Add lemon juice. Fold in flour, a small amount at a time. Add milk, mixing quickly until batter is smooth. Turn at once into ungreased tube pan and bake in moderate oven (350 degrees F.) 35 minutes, or until done. Remove from oven and invert pan 1 hour, or until cold.

This mixture may be baked in two lightly greased 8x8x2-inch pans in moderate oven (350 degrees F.) 25 minutes; or in 12x8x3-inch loaf pan in moderate oven (350 degrees F.) 30 minutes. Or turn mixture in 30 small cup cake pans, which have been greased very lightly on bottoms, and bake in moderate oven (350 degrees F.) 20 minutes, or until done.

PEANUT BUTTER HERMITTS

- 1 cup sweetened condensed milk
 - 6 tablespoons peanut butter
 - 1/4 teaspoon salt
 - 1/4 cup graham cracker crumbs.
- Thoroughly blend together the sweetened condensed milk and peanut butter. Add salt and graham cracker crumbs. Mix well. Drop by spoonfuls on a buttered baking sheet. Bake fifteen minutes, or until brown, in a moderately hot oven (375 degrees F.) This recipe makes 1 1/2 dozen.

Girl Castaway—Good Heavens!

Sailor—Now, now, don't get in a stew.

THAT DEPRESSED FEELING IS LARGELY LIVER

Wake up your Liver Bile

—Without Calomel

You are "feeling punk" simply because your liver isn't working. The two pounds of liquid bile in your bowels. Digestion and elimination are slowed down, and your entire system is being poisoned.

The liver is a liver stimulant. Something that goes further than salts, mineral water, or any other laxative. It is the only medicine which truly improves the bowels—improves the real health of the liver.

Take Carter's Little Liver Pills. Purely vegetable. No harmful calomel (mercury). Safe. Ask for them by name. Refuse substitutes. 25c. at all drug stores.

Test Route To Arctic Posts

Hudson's Bay Company Plans To Ship Supplies From Edmonton

Testing out the Mackenzie river route, the Hudson's Bay Company will ship 500 tons of supplies from Edmonton this season for its posts in the western Arctic region, according to Col. H. G. Reid, manager of the H.B. transport department for the north.

The shipments will be moved as early as possible down the Mackenzie river to Tuktoyaktuk harbor, on the Arctic coast, east of Akivik.

At that point, the supplies will be loaded on a distributing vessel to be carried to posts in the Cambridge bay, King William island and other parts of the western Arctic.

It is planned to start the distributing vessel on this trip by August 1 so as to give it time to complete its Arctic voyage and return to port before freeze-up.

From the standpoint of Edmonton and the north route, this year's experiments are of importance as successful results will mean that in future the supplies will be moved northward from this city.

Several years ago the steamer Bay-chimo was frozen in and abandoned when carrying the season's supplies to northern posts round by way of the Pacific and Bering strait to the Arctic ocean.

This route was used successfully the next year, however, but last year there was another failure and supplies had to be rushed north by way of Edmonton and the Mackenzie river to Akivik.

"The route from Vancouver through Bering strait is uncertain," said Col. Reid. "We think the Mackenzie river is more certain and for that reason are making this first experiment this year."

The difficulty of the Mackenzie route in the past had been to find a suitable trans-shiping point where the distributing vessel could meet the river boat, Col. Reid explained.

Due to sandbars at the mouth of the river, it obviously was difficult to bring a deep sea vessel into shallow water, while at the same time a river boat could not be navigated on the ocean, he said.

Last year, the Dominion government had co-operated with the company in making a survey of the Mackenzie river delta. The reports of that survey gave reasonable prospects of Tuktoyaktuk harbor being a suitable point at which the vessels could meet.

Native Son Of Jutland

Danes Setting Up Memorial Stone To Shakespeare's Hamlet

The Danes of Jutland have made clear their position—that they claim Shakespeare's hero Hamlet as a native son of Jutland—by setting up a memorial stone on the battlefield where he is said to have fallen. Some years ago a hotel-keeper in Elsinore, in eastern Denmark, labelled a local grave Hamlet's to the distress of Danes who knew their ancient history. Denmark's oldest historian, who lived about 1200 A.D., declared that Hamlet after being crowned king fell in battle on Ammelbode, or Hamlet's Heath, and was buried somewhere on the field.

The stone has been placed on a Viking mound in the field, though it is emphasized that the exact spot where the king was buried is entirely unknown. An excavation of the Viking mound failed to reveal any sign of burial. The inscription on the stone is translated as follows:

"Amled, wisest of all in Viking days, played the fool until the hour of revenge. Hailed as king by the Jutes, he rests on Ammel Hede."

Working To Lift Debt

Farmer Members In Prairie Town Show Loyalty To Church

An illustration of the grip of the Church upon the loyalties of the people of prairie Canada would seem to lie in a news item from a Saskatchewan hamlet.

There is a debt on this church of \$2,000—and little cash in sight with which to pay it off. But the church and its farmer supporters have decided to see what can be done. The church has obtained temporary possession of 50 acres of land in the territory it serves and this has been seeded to wheat, farmers supplying the seed and performing the labor.

What cash proceeds this wheat will yield will be applied on the church debt. And all the farmer members and adherents of the church will set aside a certain portion of their own lands as a "church debt" area. These tracts have been seeded, and what is realized will be turned over to the church.—Regina Leader-Post.

Germany ranks first in the number of motorcycles owned and operated.

Feels 50 lbs. Slimmer

After Losing Only 5 lbs.

"I started taking Kruschen Salts a month ago," a young woman writes. "I have lost 5 lbs. in weight, and I feel as if I have lost 50 lbs. I am full of vigor, whereas before I was listless and worried over my fatness. But if my troubles were doubled, they would not worry me to-day—thanks to Kruschen."—(Miss V. P.)

Here's the recipe that banishes fat—take one-half teaspoon of Kruschen Salts in a glass of hot water before breakfast.

Be sure and do this every morning, for "It's the daily dose that takes off the fat." When you take Kruschen daily it means that every particle of poisonous waste matter and harmful acids and gases are expelled from the system.

Modify your diet, and take gentle exercise. The stomach, liver, kidneys and bowels are tuned up, and the pure, fresh blood containing these six salts is carried to every part of the body. Then follows that Kruschen feeling of energetic health and activity that is reflected in bright eyes, clear skin, cheerful vivacity and charming figure.

Invents New Material

Belgian Major Says It Will Make Airplanes Fireproof

Major Van de Rollembeek of the Belgian Army declares he has invented a material which will make airplanes fireproof. Plates of asbestos are soaked in three chemical baths and then baked at high temperatures. Tests were made recently near Brussels. To demonstrate its value documents were put into two boxes made of the new material, and these were plunged into a blazing fire for a quarter of an hour. The papers received no injury whatever. A miniature monoplane was also covered with this preparation and then soaked in gasoline and ignited. The flames burned themselves out without any injury to the plane. To show his confidence the major sat for 10 minutes in the pilot's seat with the plane blazing all round him. The temperature in the cabin never rose above 74 degrees.

Shined Shoes Of Prince

Veteran Bootblack Had Many Experiences In Fifty Years

Hardy Bent, of Digby, Nova Scotia, veteran bootblack, once shined the shoes of the late King Edward VII., who was then Prince of Wales, and a visitor in Toronto. He will celebrate his 78th birthday in July.

A master of his trade with more than 50 years' experience, he has put up his "old stand" in the same place for the past 35 years. When he was younger he travelled, and shoes to which he applied polish and brush were the pride of their owners in New York, Toronto, Halifax, Saint John, and many other cities.

"Hardy Peg," as he is called, says that he has seen lean years, but looks forward to a bright future because he is drawing an old-age pension.

Movable Birthday Date

A Milwaukee man's sliding scale of birthdays brings dismissal of his application for an old age pension. He was listed as 45 in a life insurance policy, 58 in county relief records, 66 in his marriage papers, and 70 in his pension application. Seventy is the minimum age for eligibility to a pension.

If it wasn't for the help of a woman most self-made men would be out of luck.

OCCASIONAL WIFE

By EDNA ROBB WEBSTER
Author of "Joretta," "Lipsick Girl," etc.

SYNOPSIS

Camilla, Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a commission for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. After a party at an exclusive club, when the rest of the members of the party go to a cabaret to continue the party, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of the earnings to help him along, but Peter refuses and they quarrel. After Camilla has gone to the studio, Avis Werth calls and persuades Peter to accept a loan of \$1,000. Peter finishes his exhibit and takes Avis and Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth" and the latter, inspired by Camilla, heartily goes to Peter's studio for quiet and to think. Peter and Avis follow, and when the lights are turned on, see the statue has been shattered to pieces. Avis blames Camilla for the disaster, and Camilla, stunned by the accusation, and hurt and horrified by the accusation, faints.

(Now Go On With The Story)

CHAPTER XLVIII.

Long silences and hollow, brief remarks, like those which fill a house where death has passed, prolonged that seemingly endless night for Camilla and Peter. Neither of them slept. There was little to be said. Only their separate thoughts labored in a ceaseless turmoil and gained them nothing.

If it had been a problem to solve, a difficult decision to be made, it would have been different. But a thousand sleepless nights and all the thoughts of their lifetime could not efface this tragic thing that had come between them.

Camilla's tired eyes watched the windows being transformed into squares of gray patches with the approach of dawn, and the familiar objects in the room emerge from dark blotches into definite shapes. The empty turn-of-staircase mocked her deservingly and deepened her pain. For contrast, the modeled group in the window stood out sharply and proudly against the background of daylight.

If something had to happen to Peter's work, why couldn't it have been that piece which had been broken? It would have grieved her to lose it, but not like this! Over and over, she had wondered how the thing could have happened. It didn't seem possible that it could have been an accident from some natural cause. No, it appeared to be a deliberate act. But who could have hated Peter like that? It was almost funny that anyone could believe she had done it—last of all, Peter.

for BURNS
Mix equal parts of Minard's and sweet oil, castor oil, or olive oil. Spread on brown paper. Apply to burn. Before long the painful smarting stops.

MINARD'S
"KING OF PAIN"
LINIMENT

W. N. U. 2051

Not if he had flirted with a dozen girls and broken her heart, could she have done so terrible a thing for revenge. No, never. She loved Peter to much that she would do anything in the world for him. Then why should she be so revengeful just because he had hurt her with his sluttish attentions to Avis, to whom he felt obligated for some reason? He probably exaggerated that duty in his own mind because he always was doing kind things for other people. Avis had managed somehow to make him believe he owed her his gratitude.

Camilla had known all the time that Avis' sole purpose in taking that studio across the hall had been to influence Peter in her favor. Why any woman should so exert herself to take another woman's husband, she didn't know. And wondered if, loving Peter as she did, he belonged to another, she would still make such an effort to win him. She did not know. She was fair enough to admit that one never knew what one would do in another's circumstances.

No use to analyze all that now. Peter's loss was irrevocable. She would have to comfort him as he would permit her, and help him to revive his hopes and dreams. She would gently lead him back to the beginning again, like those brave figures he had portrayed in that sculpture he had made for her. Gazing at it again, its beauty and significance struck her so forcibly that she sat up quickly with a little gasp.

Peter, whose eyes had been closed but not sleeping, looked at her quickly.

"Peter, I have an idea," she exclaimed, and her face brightened rapidly.

"You must enter your illegitimate group in the exhibit. Looking at it in the dim light of the room and framed in the brighter background of light from the window, I just now realized how wonderful it really is."

"If it took the judges that long to discover how good it is, I might win the prize in another ten years," he snorted.

"But, dear, even if you don't win, wouldn't it be better to enter something as good as that?"

"If I can't enter a piece that I believe has some chance at least, I'll stay out."

"But it would have a chance. I know it would. If for no other reason, just because it is so different from most exhibit entries. Won't you please try it," she pleaded.

He moved his head to one side, negatively. "It's no use. Forget it. Perhaps next year—"

"Peter, you have to do it," she insisted gently. "You might even pretend that you planned to use that one all the time and were only doing the other figure for sale."

"To protect you?" he mumbled.

"Oh," she cried, wounded deeply. "Then you do—believe what Avis said."

"It isn't what I think. It's what all the others think who were here, and what they will say."

"Oh, no, Peter. I am sorry if any of them believe that I could be so cruel—but it's what you think—"

FALSE TEETH

Dr. Werne's Powder holds false teeth so firmly and comfortably in place for 24 hours—they actually feel natural—eat, laugh, sing without fear of any slipping. Prescribed by world's most eminent dentists—they know it's the best—just sprinkle on. Inexpensive—any drugstore.

important enough to consider for entry in the exhibit.

With the revival of his hopes, Avis glimpsed a faint possibility for her own, and immediately sponsored the new idea. She insisted upon serving him a hearty breakfast and then driving him to the museum with the piece of sculpture.

"Do you think I would take a chance on your tripping with your last and only hope, and breaking that?" she attempted to jest.

But his mood was not responsive. He was doing this thing more for Camilla's sake than anything. Just why, he did not know. Perhaps in memory of those first hours they had had together when life and love had lavishly promised them so much, and there had been no thought of doubts and misadventure.

As Peter had predicted, there were more entrants than usual. Improvised students competed for that privilege which would solve so many present difficulties for them, as well as others who sought the distinction and various advantages which the winning of such a prize would tender them. And, as he had expected, nude figures in innumerable symbolic poses predominated. In fact, there were few who had ventured anything else.

There were a number of weird contractions after the modern vogue, a few bursts of prominent or historic characters, some animal and bird presentations. Fountains and garden pieces constituted the artistic majority, and Peter wished mightily that his youthful figure was added to their number. He might have had a chance then. It had been good, better than many of them, and he believed it might have compared with the best of them.

He obstinately declined to accept Avis' suggestion that they pass the afternoon at a matinee or do something to take his mind from his work, and wandered about aimlessly for awhile before he returned to the studio and the suspense of awaiting the outcome. That suspense did not concern him so much now, but he was anxious to know whom his own misfortune might have favored.

Have Seadog For Pet

Boys In St. John, N.B., Planning To

Two boys who caught a seadog on the Bay of Fundy shore at West Saint John, New Brunswick, are wondering if it is really a white elephant. The young amphibian knows when to expect food, and three times a day, just before meal hour, he startles the neighbourhood with strange barking. Then the boys have to go fishing to satisfy their captive's appetite. They also feed him milk through a nipple on a baby's bottle.

After keeping the seadog in a garage for one day the boys returned it to the water and watched it swim away. Early the next morning, however, it was waiting for them on the beach below their house and followed them home like an affectionate, although awkward dog. Sometimes it goes swimming following the family rowboat, but never deserts its new pals.

The friendly ocean canine, which enjoys frequent baths in a tub near the garage, is about three feet long and has a head resembling the ordinary dog. Dragging the hind flippers, it can walk almost as fast as its human companions. Since the pet refuses to go away, the boys are planning to teach him tricks.

A preacher in New Jersey, as he looked over his large congregation at Easter Sunday morning, said: "I realize that there are many here who will not be with us again until next Easter time. I take this opportunity of wishing them a Merry Christmas."

The newest paper cups for picnics have handles.

Ask Mother—She Knows

Mother took this medicine before and after the babies came. It gave her more strength and energy when she was nervous and rundown. . . . kept her on the job all through the change. No wonder she recommended it.

A Marvel Of Architecture

Palace Of Arts In Mexico City Cost Ten Million Dollars

Many people look upon Mexicans as a somewhat barbaric people. Like Soviet Russia it is a country of periodical disturbances, but, like the Russians, they are intensely devoted to art, music and the theatre, and in the cities there is a far higher level of culture than in almost any English-speaking community.

After 30 years, the Palace of Arts in Mexico City has just been completed. The building was begun in 1904 during the regime of Porfirio Diaz, and despite frequent political changes each succeeding government has continued the work. There was never any difference of opinion about that. The Palace of Arts is a stupendous structure, housing art galleries, a national museum, a gigantic theatre which is a work of art in itself and the auditorium of which has the most wonderful lighting system ever conceived, an auditorium for concerts, rooms for exhibits, lectures and various other purposes. The building is a marvel of architecture inside and out, covers two city blocks, and cost about \$10,000,000.

In North Great Britain, Canada nor the United States could or would duplicate such a monument to the arts.—St. Thomas Times-Journal.

Women Detectives Fail

To Be Disbanded In London After Six Months' Trial

Women detectives are a failure. Given a six months' trial in detective work, women members of the London police force have brought little beyond their inborn intuitive instinct to their work.

According to the Policewoman's Review they have been found wanting in sundry other capacities needed in this type of police work, and are to be disbanded.

The average editorial on their failure, the Review states: "Many women who wish to qualify as detectives are always quite certain of their personal capacity and are often unwilling to admit the absolute necessity of training to do their instinct."

"The average woman is by nature entirely opposed to detective work and we see in this choice a safeguard to herself and a guarantee that her contribution to police work must be along different lines to those of men."

"We find ourselves unable to consider the disbanding of the women detectives as disastrous."

THE RHYMING OPTIMIST

By Aline Michaelis

NEW POETS

We know the songs old poets all have made,
How they have painted life's divinest things
In words so splendid, now words are as shade
To know how futile any phrase must be
Which follows after perfect speech is overed.

Our poems are as moths tossed out to sea,
While theirs are strong gulls wheeling overhead.

In spite of this, who can from song refrain
When the passion of his every hour?
When through his veins is poured the lyric strain
Who can keep silence and renounce his power?

We know old poets sung sublimely well,
Yet each new heart has its own tale to tell!

More British Films

English Film Industry Has Greatly Increased Output

The English film industry has quadrupled its production in the past few years, it was revealed recently, and the report pointed out that the quality of the films has led England's movie houses to show twice as many British films as the law requires.

The "boom" in English films has led to a production of an average of 10 films per week, or some 200 for 1934, if the present pace is maintained, as against the former annual averages of 50 to 60.

In Canada the distillery industry provides the largest industrial output for a war time. Small amounts are used for human food products while a considerable proportion is fed or otherwise consumed on farms.

Under the hog grading regulations, no carcass grading is authorized at an abattoir until scales and equipment for grading have been approved by the Dominion Minister of Agriculture.

Almost Instant Relief From Neuralgia

For Quick Relief Say ASPIRIN When You Buy

Now comes amazingly quick relief from headaches, rheumatism, neuritis, neuralgia, . . . the fastest safe relief, it is said, yet discovered.

These results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of pain a few minutes after taking.

The illustration of the glass here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly as you swallow it. And this is ready to go to work almost instantly.

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN'S quick relief, be sure the name Bayer in the form of a cross is on every tablet of Aspirin.

Does Not Harm the Heart

Prairie Fruit Orchards

Scientific Fruit Breeding Of Great Assistance To West

The scientist is coming to the aid of the prairie settler in enlarging the variety and increasing the volume of home-grown fruits for his table. The work of the scientist in other fields of agricultural production is, of course, already widely recognized.

Marquis wheat, originated by Dr. Saunders at the Canadian Government Experimental Farm at Ottawa, which combined adaptation to a short season with high milling qualities, has literally rolled the map of agricultural areas northward. More recent scientific achievements seem likely to master the wheat scourge known as rust. While these and similar developments have occupied public attention, persistent and successful work has been carried on in adapting or creating varieties of fruit suitable to the prairie soil and climate. It is now predicted that if scientific fruit breeding continues at the present rate of progress, within the next twenty years the Western prairies will have a range of fruits approximately equal in quality to those now grown in the principal fruit-growing areas of Canada.

In their natural condition the Canadian prairies produce wild fruits in considerable variety. The delicious strawberry is native to very large areas. Raspberries, gooseberries, currants, cranberries, saskatoons and plums grow wild in many localities. Apples were introduced many years ago and varieties have been developed which do well under prairie conditions. Already any farmer who can grow wheat can have a considerable variety of fruits, and with scientific fruit breeding it is predicted that this variety will be increased.

Trophy In Dublin Museum

One Of Last Scalps Taken By Manitoba Sarsce

A black tuft of hair lifted from the head of a Gros Ventres warrior by a Sarsce Indian brave and one of the last scalps taken by Manitoba's dusky aborigines, rests under a glass case in the Dublin museum to-day, a concrete reminder to Irishmen that the Canadian west was once wild and woolly.

Ex-Mounted Police Constable Frank Dobbs, Shoal Lake pioneer, purchased the scalp in 1879 from Sarsce Indians of the Lizard Point reserve. He met them returning from their last brush with the Gros Ventres, an American band, and bought the scalp lock for a sum of five dollars. Afterwards, while visiting his home in Ireland, he presented the trophy to the Dublin museum.

After 40 years of publication exclusively as a farmers' journal, The Weekly Sun, formerly The Farmers' Sun, will become an urban weekly with a rural edition. It was announced at Toronto. The paper has been taken over by Graham Spry, vice-president of the Ontario Council of the Commonwealth Co-operative Federation.

The Alps are believed to have risen from a seaway four to seven times their present width.

Little Helps For This Week

"Serve Him with a perfect heart and a willing mind." 1 Chronicles 28:9.

Let not soft slumber close your eyes.

Before you've recollected thrice The train of action through the day:

Where have my feet chosen out their way?
What have I learned where'er I've been,

From all I've heard, from all I've seen?
What have I more that's worth the knowing?

What have I done that's worth the doing?
What have I sought that I should find?

What duty have I left undone,
Or into what new follies run?
These self-inquiries are the road That lead to virtue and to God.—Dr. Isaac Watts.

Little things come daily and hourly within our reach, and they are not less calculated to set forward our growth in holiness than are the greater occasions which occur but rarely. Moreover fidelity in trifles, and an earnest seeking to please God in little matters, are a test of real devotion and love. Let your aim be to please our dear Lord perfectly in little things, and to attain a childlike simplicity and dependence.—Jean Nicolas Grou.

First Weather Forecast

Admiral Fitzroy Evolved System Seventy-Three Years Ago

The first official storm warning was printed by daily papers just seventy-three years ago. And how the scoffers scoffed when it proved accurate! The official responsible for such a daring commitment was Admiral Fitzroy, who, as first director of the Meteorological Department, then under the control of Board of Trade, deserves to be remembered as the father of the weather forecast.

He evolved the system of collecting and collating reports from a number of scattered sources. Whereas the modern forecaster is kept in touch with conditions all over the world, he received but five reports from abroad, and these were usually a day or two late! Fitzroy came to an untimely end; overwork drove him to suicide in April, 1865. He left behind him a mass of valuable data on weather observations at sea.

Deadly snake venom has been found useful in the treatment of several diseases.

Mentally, some men and women never grow old, no matter how many years they have to their credit.

THE CHINOOK ADVANCE

Published by Mrs. M. C. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class mail matter.

All letters addressed to the editor for insertion in The Advance, must be signed to show bona fides of the writer. Publication in all cases is subject to the judgment of the Publisher. We do not necessarily coincide with views expressed.

The subscription rates to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada. The transient advertising rates in The Advance are—display, 40¢ per inch for first week and 30¢ for each succeeding week, providing no change is made. For heavy composition an extra charge is made for first week. Reading notices, 10¢ per cent line. Legal advertising, 15¢ per cent line for first week and 10¢ for each succeeding week. Cards of thanks, \$1.00.

SMALL ADVERTISEMENTS

Advertisements under this heading are charged at the rate of 50¢ for 25 words or less per week, with 10¢ for each additional 5 words. Three weeks for the price of two.

The Speech Delivered By Major Douglas To Legislative Assembly

Continued From Last Week

In England a group of prominent British industrialists and financiers addressed an open letter to the Times on April 4th asking Parliament to consider reform of the monetary system. They demanded reform, not for London alone, but for the whole nation. They said: A system must, in our view, be established under which the issue and recall of currency and credit can be regulated on a rational NATIONAL scientific basis, so that the correct number of money tokens shall be available to consumers to enable them to enjoy the output of production.

It will be seen therefore that the evidence adduced at Edmonton the impressions left there, and the opinions of monetary reformers throughout the world are overwhelmingly in favour of a National Plan, and permit me to point out the obvious fact that as far as Canada is concerned, a national plan would provide include Alta.

I wish to devote a few minutes to a certain booklet called "The Douglas System of Economics". This booklet was written locally and has had a wide circulation throughout the Province. In its favor it may be said that it has been the means of bringing the name of Douglas to many hundreds of people who would otherwise never have heard of him. It was, I believe, written with the greatest sincerity, and was meant to be not so much a learned treatise on Douglas, as a book for beginners and a vehicle for the advancement of a plan for Alberta exclusively. There is in London, England, a body known as the Social Credit Secretariat, of which Major Douglas is the Chairman. One of the chief duties of this body is to criticize all Douglas literature or literature that purports to be Douglas literature which is submitted to it. The booklet above referred to was submitted to the Secretariat sometime last year and was duly criticized. A copy of the criticism was sent to the Douglas Credit League of Canada, from which I received excerpts some months ago. In view of the nature of these criticisms I deemed it in the best interests of the movement not to publish them as they were condemnatory in the extreme. These were the motives that actuated me whilst giving evidence at Edmonton, where, even under the stress of direct questioning, I avoided a presentation of them. I felt that it was not a matter that I was called upon to decide, and that upon his arrival, Major Douglas would no doubt clear up the situation. This he did in Edmonton on Tuesday the 10th of April. In reply to questions he said he was not familiar with the pamphlet and that he had not approved of its contents. He also said that the Secretariat did not accept it and had pronounced it technically unsound. The above is a matter of record, and together with the rest of the evidence will probably be made available to the public in printed form. It is, however, most regrettable to find that there is still a good deal of credence placed in this pamphlet and I have been asked to try to set this matter right in a way that would not antagonize any particular group.

On the one hand the Secretariat desires the facts to be publicly known and on the other hand I have been urged entirely to disregard this section of the movement on the plea that it will in the end do no harm. After a great deal of consideration I have decided that for the present I will not publish these criticisms, which I may say do not speak of any particular error, but in a sweeping statement condemned the whole booklet.

(Concluded Next Week)

W. I. Meeting

The June meeting of Chinook Women's Institute was held Tuesday, June 15, at Mrs. Lee's home. The attendance was not as large as usual but the afternoon was profitably spent. The constituency Conference is being held this year at Youngstown on September 6th. All business commenced with the conference will be dealt with at the August meeting, and there will be no meeting in September.

The July meeting will be held at Mrs. Jas. Young's home, and will be in the form of social afternoon. The members from Youngstown, Crest and Little Gem have been invited to meet with us. Mrs. Lee, Mrs. Sewert and Mrs. Robinson have charge of the entertainment, and Mrs. Willigan's committee takes care of the refreshments.

After the business was concluded, Mrs. Turple took charge of the oiling programme on "music".

1. Assembly singing, "The Old Spinning Wheel".

2. Paper, "Why every boy should study music", Mrs. Turple.

3. Pianologues and encore, Mrs. Rideout.

4. Paper, Dr. Henry Robb, an outstanding Toronto musician, Mrs. Chapman.

5. Paper, Cecil Chaminade, Mrs. Turple, at the conclusion of this paper Mrs. Turple played on Chaminade's compositions, and gave as encore Mendelssohn's "Consolation".

6. Two piano solos were rendered very nicely by Sidney Langley.

And Glen Turple, played a couple of his little pieces, Glen showed real musical ability.

The afternoon was brought to a close by singing the National anthem, and repeating Mizpah.

Visitors are welcome to attend July meeting.

Eight Near Death Due To Poisoning at Oyen

Timely Action Saves Two Oyen Families from Death After Drinking Bad Water

Oyen, Alta., June 11 (special)—Eight persons in Oyen had a narrow escape from death by poisoning here on Saturday, owing their lives to timely aid rendered by Dr. D. L. Dick.

It is believed that the tragedy was due to drinking contaminated water from a barrel.

The persons affected were Mrs. Joe Long and her two children, Allen and Roy; and Mr. and Mrs. Christenson and their three children Homer, Walter and Elsie, all of whom were taken violently sick Saturday afternoon. Dr. Dick was called and administered emetics at once and it is believed this action saved their lives. All except Mrs. Long are now out of danger.

A sample of the water has been sent to Edmonton for analysis.

Notice of Sale

Notice is hereby given under Section 48 of the Domestic Animals Act (Municipalities) that a black gelding, weight about 900 lbs., age 6, branded [redacted] was impounded in the pound kept by G. Ray Robinson, located on the S.E. 1/4 Sec. 5, Twp. 27, Rge. 7, with M. on the 3rd day of June 1934, and that that said animal was sold on the 16th day of June 1934, to L. F. Peyton of Chinook and that said animal may be redeemed by the owner or on his behalf within a period of 30 days from the publication of this notice in the Alberta Gazette upon payment of all fees and costs due to the municipality and the purchaser of said animal.

For information apply to R. B. Langley, Sec. Treas. Municipal District of Chinook No. 243, Chinook, Alta.
